SDGs AND SDG TARGETS AND LINKAGES

34. Comments on SDG linkages

Water governance is the subject of SDG 6.B (community involvement in water governance), and also relates to SDGs 6.1 (access to drinking water), 6.2 (sanitation), 6.3 (water quality), 6.4 (water-use efficiency), 6.5 (integrated water management) 6.6 (protecting water-related ecosystems), 6.A (capacity building and international co-operation). This in turn is related to SDGs 1.4 (access to property and resources, including water), 1.5 (building resilience to natural and other disasters among the poor), 2.4 (sustainable food production and capacity to face drought and climate change), 3.3 (end epidemics of water-borne and other communicable diseases), 3.9 (protection from water pollution and contamination), 3.D (management of national and global health risks), 10.2 (social, economic and political inclusion of all), 11.3 (participation in urban development), 11.5 (reduce the impact of water-related and other disasters), 11.6 (reduce the environmental impact of cities), 11.B (plans for Disaster Risk Reduction), 12.4 (management of wastes), 12.8 (information for lifestyles in harmony with nature), 13.1 (adaptive capacity to climate change), 13.3 (human and institutional capacity to address climate change), 15.1 (conservation of freshwater ecosystems and services), 15.3 (combat desertification and restore degraded land), 15.9 (nature and ecosystem values in planning), 16.6 (effective, accountable and transparent institutions), 16.7 (inclusive decision making), 16.10 (access to information and protect fundamental freedoms), and 16.B (laws and policies for sustainable development), 17.14 (policy coherence), 17.16 (international partnerships) and 17.17 (multistakeholder partnerships). The resource can be used to support Education for Sustainable Development (SDG 4.7)

35. SDGs and SDG targets the resource helps advance

SDG 1: End poverty in all its forms everywhere

1.4 By 2030, ensure that all men and women, in particular the poor and the vulnerable, have equal rights to economic resources, as well as access to basic services, ownership and control over land and other forms of property, inheritance, natural resources, appropriate new technology and financial services, including microfinance

Numbers and proportions of people from particular groups using collections in comparison with demographics in broader society.

Numbers of people accessing collections.

Number of targeted programmes that aim to enhance access to collections by disadvantaged groups.

Sustainable tourism that enhances local communities' access to basic services, ownership and control over land and other forms of property (including cultural and natural heritage), as well as to technology and markets.

Involvement of people from disadvantaged groups in decisionmaking activities and processes relating to collections and

collections-based institutions. SDG 1: End poverty in all its forms everywhere Number of collecting programmes that aim to build resilience to 1.5 By 2030, build resilience of climate-related events and other shocks and disasters, for the poor and those in example by forming collections that can contribute to related vulnerable situations and educational and research programmes. reduce their exposure and vulnerability to climate-Number of educational programmes drawing on collections that related extreme events and incorporate resilience perspectives. other economic, social and environmental shocks and Number of targeted programmes drawing on collections that are aimed at vulnerable groups, to build their resilience to climatedisasters. related and other shocks and disasters. Number of research programmes drawing on collections that are aimed at building resilience to climate-related and other shocks and disasters. Strengthen the resilience of employees, communities and suppliers by paying at a minimum the living wage and offering insurance to employees and their families, such as accident insurance; and by paying fair prices to all suppliers SDG 2: End hunger, achieve food security and improved Collections development related to sustainable food production nutrition and promote where appropriate. sustainable agriculture 2.4 By 2030, ensure Number of educational and awareness-raising programmes sustainable food production incorporating sustainable food production perspectives, and that aim to reduce the impact of disasters on communities. systems to implement resilient agricultural practices that increase productivity and Number of targeted programmes that support those most production, that help maintain exposed and vulnerable to disasters, whether locally or farther afield. ecosystems, that strengthen capacity for adaptation to climate change, extreme Number of research activities drawing on collections that relate weather, drought, flooding to resilient agricultural practices, helping mitigate and adapt to and other disasters and that climate change, flooding and other disasters. progressively improve land and soil quality. Policies and plans in place to eliminate unsustainable food production from supply chains and in any food provision in collections-based institutions. Number of partnership activities drawing on collections that contribute to Disaster Risk Reduction plans, supporting resilient agricultural practices, and helping mitigate and adapt to climate change, flooding and other disasters.

Collection development that can contribute to programmes

SDG 3: Ensure healthy lives and promote well-being for

all at all ages

3.3 By 2030, end the epidemics of AIDS, tuberculosis, malaria and neglected tropical diseases and combat hepatitis, waterborne diseases and other communicable diseases

addressing AIDS, tuberculosis, malaria and/or neglected tropical diseases, combat hepatitis, water-borne diseases and other communicable diseases.

Number of educational programmes addressing these subjects.

Number of targeted educational and participatory programmes for marginalized and at-risk groups relating to communicable diseases.

Number of research activities that help understand the causes and manage impacts of tuberculosis, malaria and other communicable diseases.

Partnerships in place to help ensure effective governance of communicable diseases, public health information and education relating to communicable diseases.

Steady flow of reliable information relating to communicable diseases.

SDG 3: Ensure healthy lives and promote well-being for all at all ages

3.9 By 2030, substantially reduce the number of deaths and illnesses from hazardous chemicals and air, water and soil pollution and contamination

Plans, policies and procedures in place to prevent harmful exposure to hazardous chemicals associated with collections, or collections-related activities.

Plans, policies and procedures in place to ensure hazardous chemicals and other forms of pollutant are properly managed and disposed of, to prevent release into the natural environment.

SDG 3: Ensure healthy lives and promote well-being for all at all ages

3.D Strengthen the capacity of all countries, in particular developing countries, for early warning, risk reduction and management of national and global health risks.

Number of collecting initiatives that aim to build capacity for risk reduction to national and global health risks, for example by storing and preserving collections that may be of use in post-disaster scenarios, or that can be used in early warning and risk communication activities.

Number of educational programmes incorporating perspectives on early warning, risk reduction and management of national and global health risks.

Number of awareness raising programmes that target marginalized and vulnerable groups most exposed to health risks.

Plans in place for early warning, risk reduction and management to national and global health risks.

Relationships and partnerships in place for risk reduction and management in light of national and global health risks.

SDG 4. Ensure inclusive and equitable quality education and promote lifelong learning opportunities for all

4.7 By 2030, ensure that all learners acquire the knowledge and skills needed to promote sustainable development, including, among others, through education for sustainable development and sustainable lifestyles, human rights, gender equality, promotion of a culture of peace and nonviolence, global citizenship and appreciation of cultural diversity and of culture's contribution to sustainable development

Numbers of people in each type of programme drawing on collections from different demographic groups.

Increases in numbers of people in each type of programme from different demographic groups.

Proportion of people involved in such programmes in relation to overall audience size.

Evidence that learners have acquired knowledge and skills to promote sustainable development.

SDG 6. Ensure availability and sustainable management of water and sanitation for all 6.1 By 2030, achieve universal and equitable access to safe and affordable drinking water for all

Collections development, to ensure collections can be used to help support water quality programmes.

Number of educational, awareness-raising, research and partnership programmes using collections that aim to ensure people have access to safe and affordable drinking water.

SDG 6. Ensure availability and sustainable management of water and sanitation for all 6.2 By 2030, achieve access to adequate and equitable sanitation and hygiene for all and end open defecation, paying special attention to the needs of women and girls and those in vulnerable situations

Collections development, to ensure collections can be used to help support water quality programmes.

Number of educational, awareness-raising, research and partnership programmes using collections that aim to ensure people have access to adequate sanitation and hygiene, paying special attention to the needs of women, girls and those in vulnerable situation.

SDG 6. Ensure availability and sustainable management of water and sanitation for all 6.3 By 2030, improve water quality by reducing pollution, eliminating dumping and minimizing release of hazardous chemicals and materials, halving the proportion of untreated

Amount of pollutants, and reduction in pollutants, to water systems.

Plans in place for the identification, reduction, replacement and recycling of hazardous chemical and materials, to prevent their release into water systems, with plans to eliminate their use as soon as possible.

institutions at all levels. 16.7 Ensure responsive, inclusive, participatory and representative decision- making at all levels	who believe decision-making is inclusive and responsive, by sex, age, disability and population group Decision-making addresses societal, environmental and economic challenges related to the community, considering short-term and long-term risks and opportunities. Decision-making draws on diverse backgrounds, viewpoints and interests, reflecting a broad base of stakeholders, and working to promote inclusion and provide effective services for all of society.
SDG 16. Promote peaceful and inclusive societies for sustainable development, provide access to justice for all and build effective, accountable and inclusive institutions at all levels. 16.10 Ensure public access to information and protect fundamental freedoms, in accordance with national legislation and international agreements	Adopt and implement constitutional, statutory and/or policy guarantees for public access to information. Plans in place, and plans implemented to enhance public access to information relating to collections. Plans in place, and plans implemented to support fundamental freedoms, in line with human rights, national and international agreements and legislation. Plans and procedures in place for public access to information relating to the operation and management of collections-based institutions. Complaint mechanism in place for public to use where public access to information and fundamental freedoms not supported or fulfilled.
and inclusive societies for sustainable development, provide access to justice for all and build effective, accountable and inclusive institutions at all levels. 16.B Promote and enforce non-discriminatory laws and policies for sustainable development	16.B.1 Proportion of population [audience/users/non-users] reporting having personally felt discriminated against or harassed in the previous 12 months on the basis of a ground of discrimination prohibited under international human rights law Number and proportion of policies that incorporate sustainable development considerations, in the full sense of recognizing all three of social, economic and environmental considerations.
SDG 17. Partnerships for the goals 17.14 Enhance policy coherence for sustainable development	Proportion of policies that incorporate sustainable development considerations, linking to SDGs and targets. Incorporation of policy considerations from outside the collections sector into policies of collections-based institutions, to facilitate partnerships and effectiveness.

SDG 17. Partnerships for the goals

17.16 Enhance the global partnership for sustainable development, complemented by multi-stakeholder partnerships that mobilize and share knowledge, expertise, technology and financial resources, to support the achievement of the sustainable development goals in all countries, in particular developing countries

Number and/or increase in number, and diversity of global and international multi-stakeholder partnerships that share collection-related knowledge, expertise, technology and financial resources to address the SDGs, or that otherwise involve collections-based organisations and institutions.

Number and/or increase in number, and diversity of global and international multi-stakeholder partnerships involving developing countries that share collection-related knowledge, expertise, technology and financial resources to address the SDGs.

SDG 17. Partnerships for the goals

17.17 Encourage and promote effective public, public-private and civil society partnerships, building on the experience and resourcing strategies of partnerships

17.17.1 Amount of United States dollars committed to publicprivate and civil society partnerships

Number and/or increase in number, and diversity of local, national and regional multi-stakeholder (public, public-private and civil society) partnerships that address the SDGs drawing on collections, or that otherwise involve collections-based organisations and institutions.
