AIMS AND CONTENT	
20. What issues does the resource aim to address?	<p>“Are you looking for tools and solutions to achieve the SDGs at the local level? We invite you to explore the resources available on this website and to join our growing global community!</p> <p>The success of the 2030 Agenda for Sustainable Development hinges on effective collaboration between all relevant actors. Knowledge, resources, skills and partnerships will need to be mobilized on an unprecedented scale to implement all of the 17 Sustainable Development Goals (SDGs).</p> <p>Local2030: Localizing the SDGs is a network and platform that supports the on-the-ground delivery of the SDGs, with a focus on those furthest behind. It is a convergence point between local and regional governments and their associations, national governments, businesses, community-based organizations and other local actors, and the United Nations system. Local2030 supports local leaders in collaboratively incubating and sharing solutions, unlocking bottlenecks and implementing strategies that advance the SDGs at the local level.</p> <p>Via this online platform, Local2030 partners are sharing tools, experiences, new solutions and guides to support SDG localization. A core feature is the toolbox, which contains a range of concrete, practical and adaptable mechanisms and instruments that support the development, implementation, monitoring and review of locally-appropriate SDG actions.</p>

	<p>With the aim of providing a one-stop-shop on SDG localization resources and tools for stakeholders, this platform combines prior work by Localizing the SDGs and Local2030. In the coming months, Local2030: Localizing the SDGs will progressively roll out new tools and resources to complement existing work reflected on this website.” (About)</p> <p>“The main goal of this Toolbox is to facilitate an articulated set of tools to support local stakeholders and their networks, under the leadership of local, regional and national governments.</p> <p>The Toolbox seeks to raise awareness of the SDGs among local and national actors. It aims to improve their knowledge of the 2030 Agenda, familiarise them with the implications, opportunities and challenges in localizing it, and urge stakeholders to fully realise their crucial role. As an advocacy platform, it also seeks to create an enabling environment for the localization process, to support local ownership and ensure the SDGs integration in sub-national strategies and plans.</p> <p>The Toolbox takes stock and reviews existing tools, systematizes outputs and avails the findings to policy-makers, local officers, experts and actors of local relevance. It aims at being a practical support for local stakeholders, and in particular local and regional governments, by pointing out best practices that are reliable and replicable in order to efficiently design, implement and monitor policies in line with the SDGs.</p> <p>The process empowers actors within the new development architecture, including local, regional and national governments, civil society organizations, private firms, universities and research institutions. Our purpose is to better integrate various actors across the immensely dynamic social, regional, political and economic landscapes of territories. No matter what stage your initiative is at, or what SDG you pursue, you will find relevant, curated tools here to help achieve them.” (Tools: Purpose)</p>
